Bellevue Rider Services Building

The Bellevue Rider Services Building is adjacent to the Bellevue Transit Center in downtown Bellevue. Rider amenities include rider information and transit schedules, public phones, community information, bike racks and public restrooms. Sidewalk improvements adjacent to the Bellevue Transit Center were also completed in 2002 as part of this project.

Additional amenities of the transit center include a City of Bellevue Police Station located in the Rider Services Building, and public art.

Mode
Bus

Highlights
Construction completed: June 2006

Location: Near the northeast corner of 108th Avenue NE and Northeast Sixth Street

Budget: $3.5 million

Planning partners: Sound Transit, City of Bellevue, Federal Transit Administration

Consultants & contractors
Preliminary engineering, environmental documentation and final design: Entranco Engineering
Construction: Summit Central Construction Inc.
Public art: Stuart Keeler and Michael Machnic; Barbara Grygutis

Public art
"The High Road" by artist team Stuart Keeler and Michael Macnic features three bronze eggs balanced atop stilts that speak to the cycles of commuting and mass transit's respect of nature. On the northeast corner of the transit center, an internally lit sculpture by Barbara Grygutis titled "Windswept," evokes an ancient, weathered tree.
